

**Waiting to be registered  
at the Court of Lecce**

**ISSN: 2612-7571 (on line)**

Is an online open access scholarly journal, whose purpose is to publish high quality peer-reviewed scholarly articles, book symposia, critical notices, and book reviews in English, in support of the ASES mission to promote philosophical scholarship and education.

### **Publication Cycle**

E&C comes out every 4 months  
(3 volumes per year)

### **Type of articles**

E&C is open to different ideas and approaches, but it is particularly interested in articles from the ontological and metaphysics traditions. It welcomes original articles; reviews; confutations; comments inherent to the fundamental issue of philosophy and in particular of ontology.

E&C does not consider submissions that are under review at another journal. We will reject submissions that violate this condition and may refuse to consider further submissions by its author.

### **Reviewing Practice**

E&C is committed to the highest standards of independent double blind peer-review integrity and upholding review. This means that for each manuscript undergoing peer review, authors and referees will not be informed of each other's identity; and the editorial board, including the editor-in-chief, will not be informed of authors' identities.
