Is an online open access scholarly journal, whose purpose is to publish high quality peer-reviewed scholarly articles, book symposia, critical notices, and book reviews in English, in support of the ASES mission to promote philosophical scholarship and education.

Publication Cycle

E&C comes out every 4 months
(3 volumes per year)

Writings of E. Severino:

La struttura originaria @ 1981 Adelphi Edizioni
Intorno al senso del nulla @ 2013 Adelphi Edizioni

Type of articles

E&C is open to different ideas and approaches, but it is particularly interested in articles from the ontological and metaphysics traditions. It welcomes original articles; reviews; confutations; comments inherent to the fundamental issue of philosophy and in particular of ontology.

E&C does not consider submissions that are under review at another journal. We will reject submissions that violate this condition and may refuse to consider further submissions by its author.

Reviewing Practice

E&C is committed to the highest standards of independent double blind peer-review integrity and upholding review. This means that for each manuscript undergoing peer review, authors and referees will not be informed of each other's identity; and the editorial board, including the editor-in-chief, will not be informed of authors' identities.
